

**PRODUCT INFORMATION****SLAKED LIME CL90 S**

CAS : 1305-62-0

The Place of Manufacture : Çelemlı District Munak Street No:5 Yüreğir \ ADANA

Product Description : It is the lime obtained by reacting the CaO obtained in our Parallel Flow Ovens with water in the Slaking Facility.

Chemical Properties of the Product :

	% Value	EN 459-1:2010
Free Ca(OH) ₂	min.88	
Total CaO + MgO	min.90	min.90
MgO	mak.3	mak.5
Free Water	mak.1	mak.2
SO ₃	mak.2	mak.2

Physical Properties of the Product :

	% Value
≥ 90 µm	max.1
Intensity (kg/dm ³)	0,4-0,6

Packaging:

Packaging	Silo Truck	PP Bag	Bigbag

General Use Areas : It is used in the Construction Sector, Stabilization of Clayed Soils, Mining Sector, Chemical Sector, Paper Industry, Flue Gas Treatment, Drinking Water Treatment and Waste Water Treatment plants.

- The Information in this Technical Data Sheet is Defined for the Specified Product and This Data is Technical Measurement Results Made/Caused to be Made by Vişne Madencilik, Chemical and Physical Analyses are within the scope of TSE EN 459-2 Standard.
- Determined Analysis Results depend on the Sample Received and are not Binding, Suitability for Use of the Product is under the responsibility of the User Person or Institution and All Losses that may arise as a result of its use are under the responsibility of the User Person or Institution.
- Reproduction without the permission of Vişne Madencilik Üretim San.Tic.A.Ş. is prohibited.
